

CURIOUS WORLD™

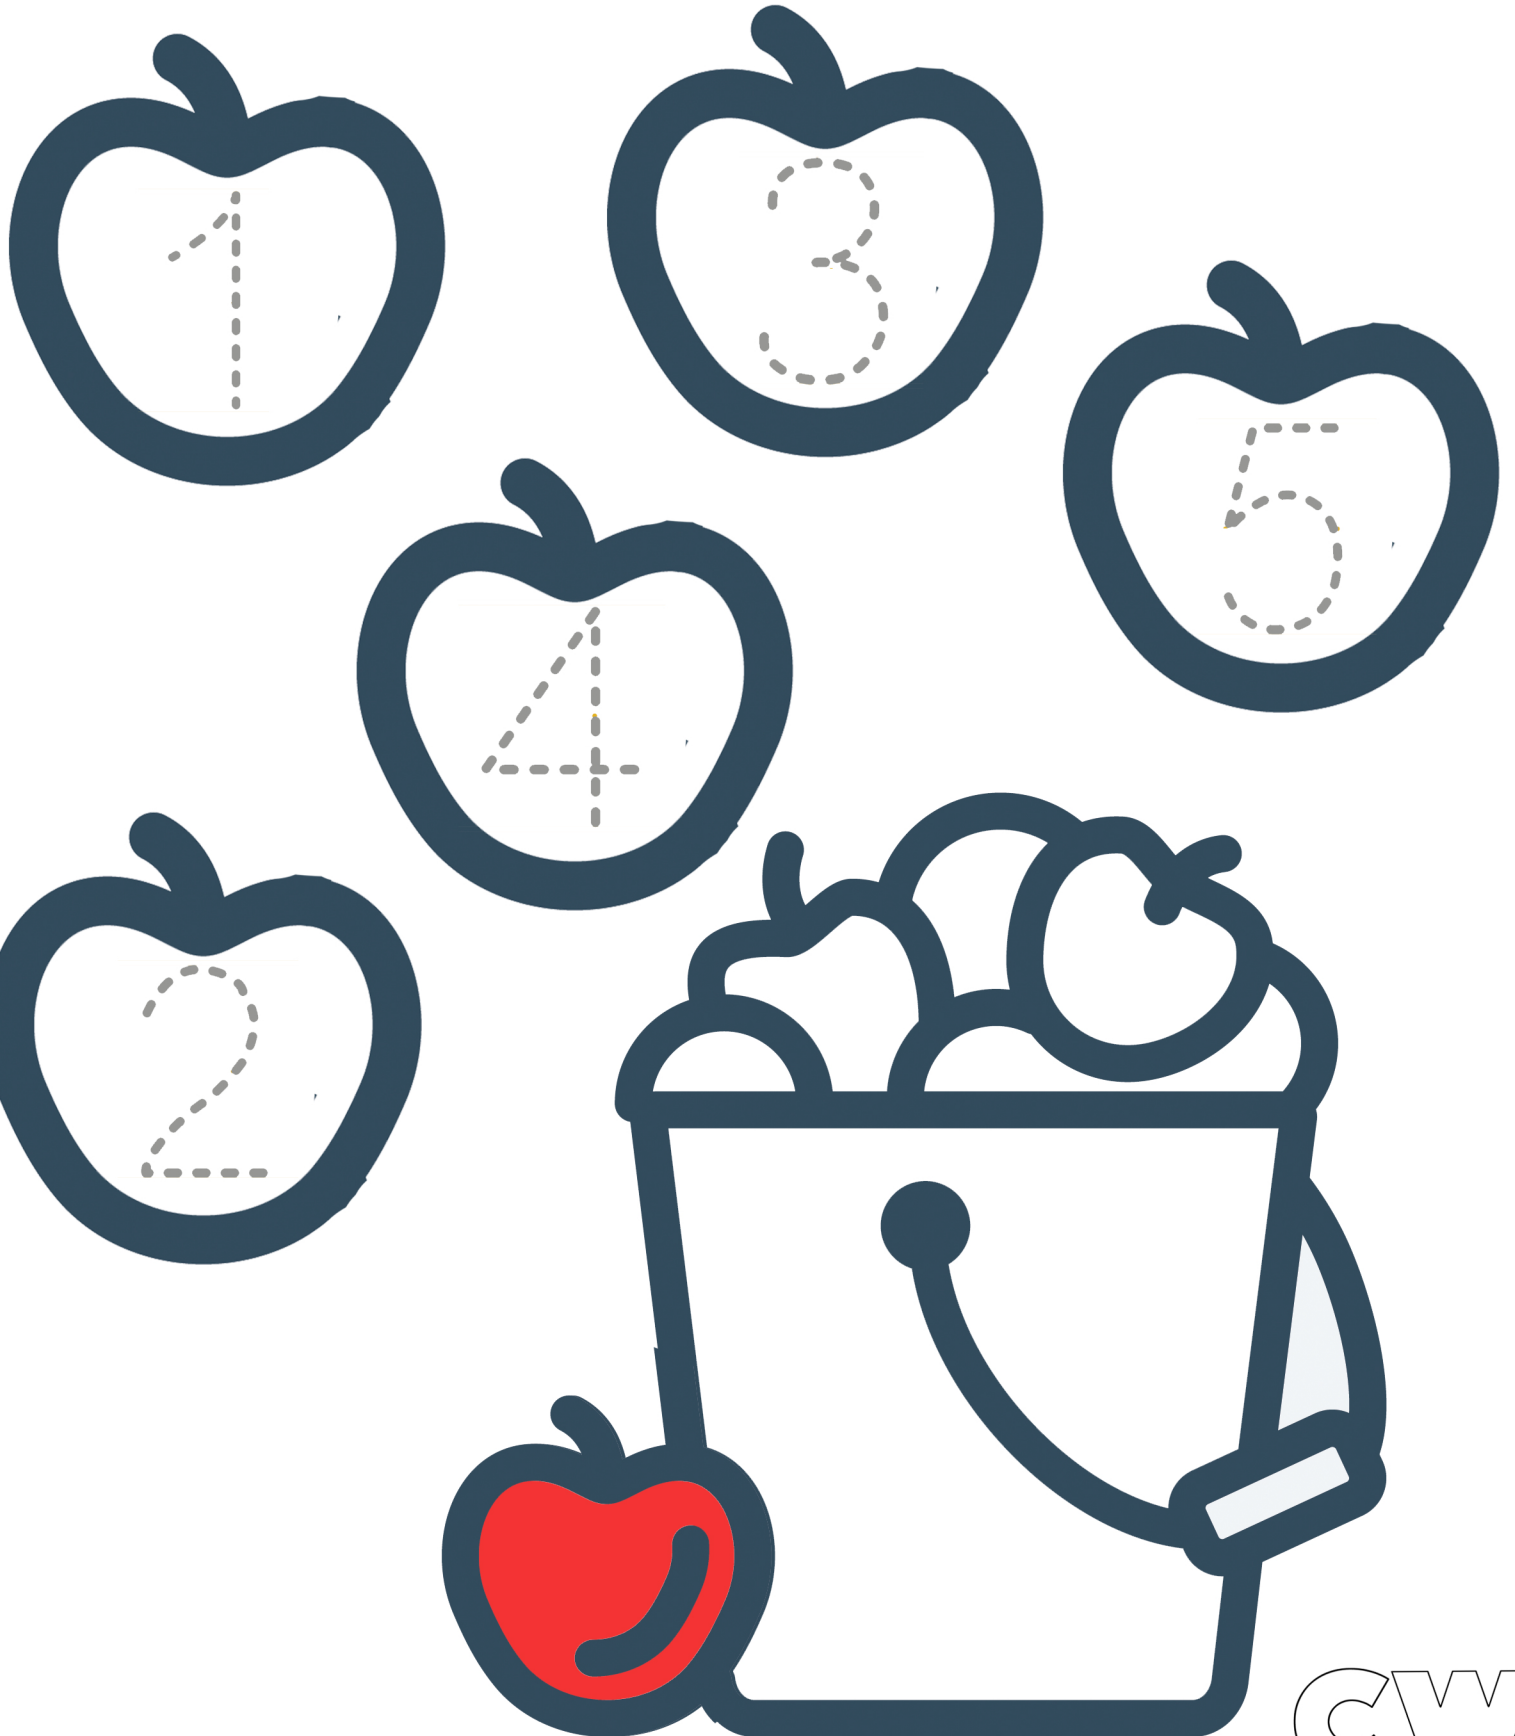

Backyard

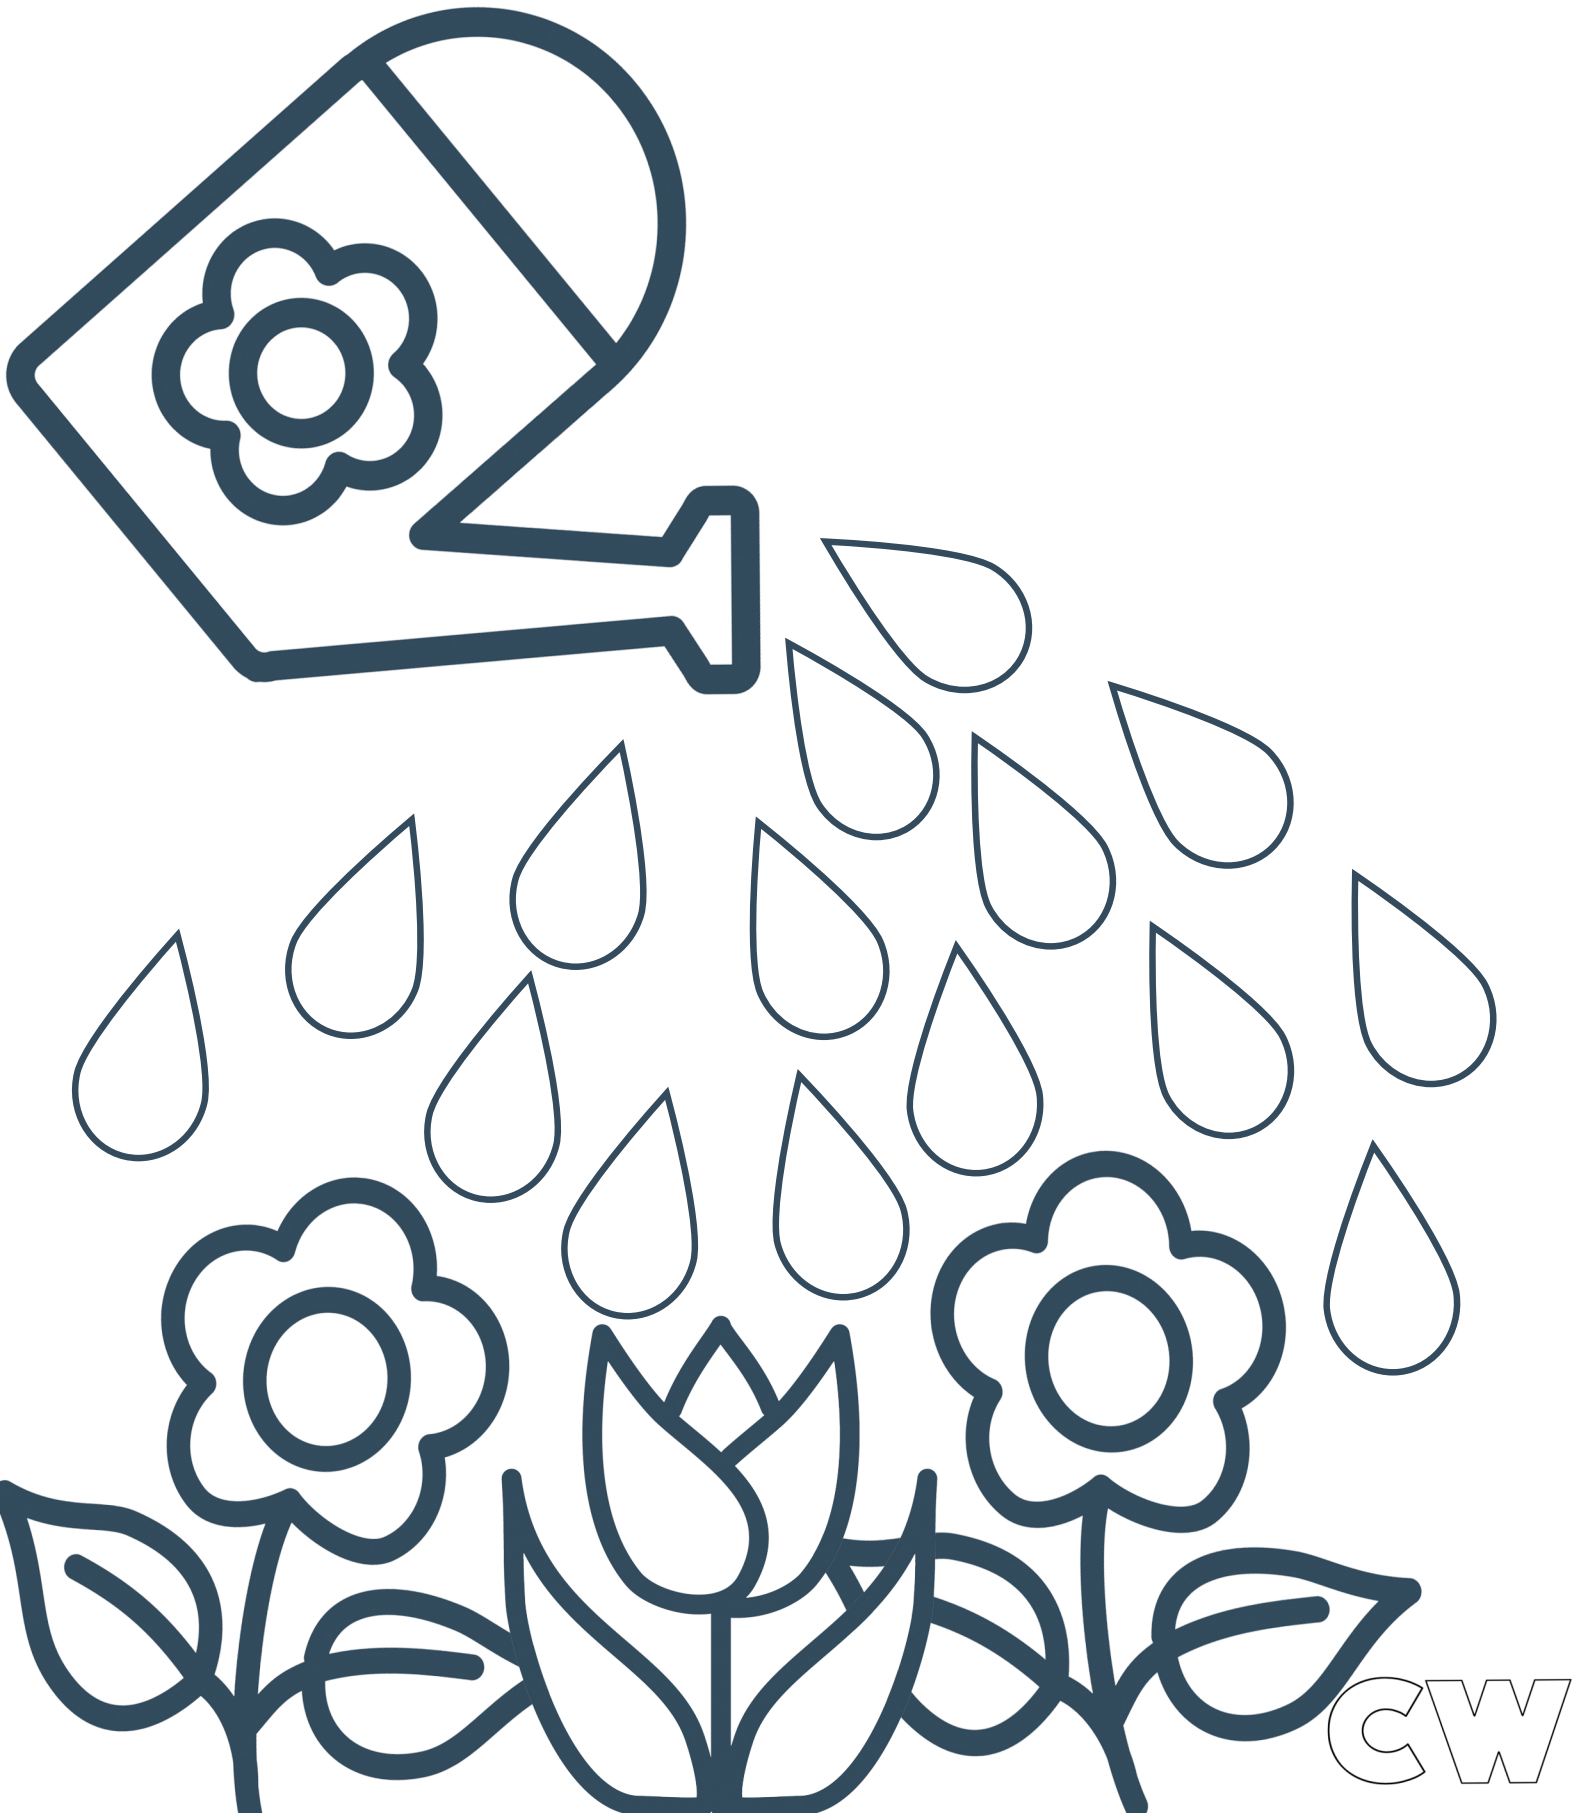

Fun

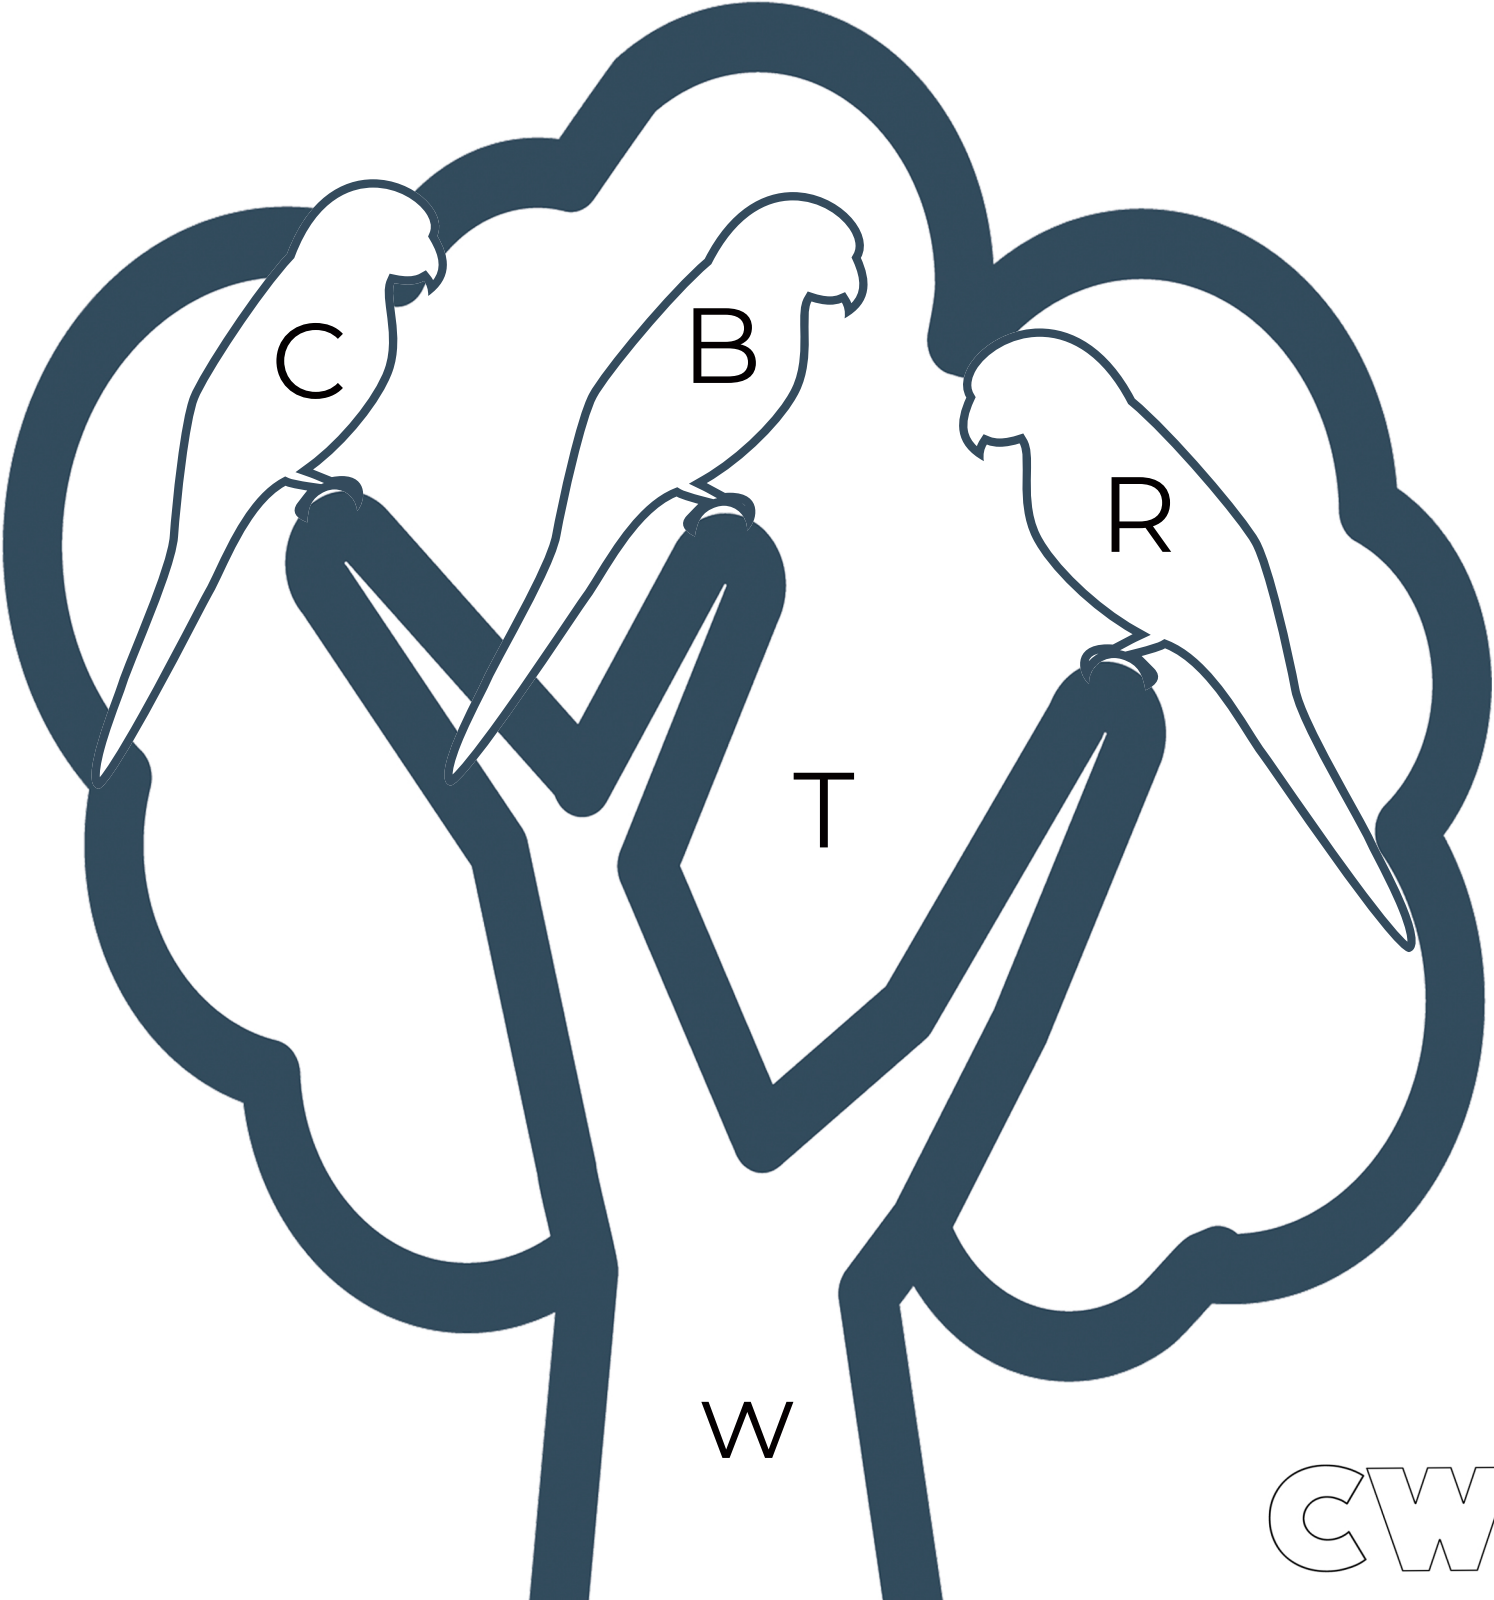

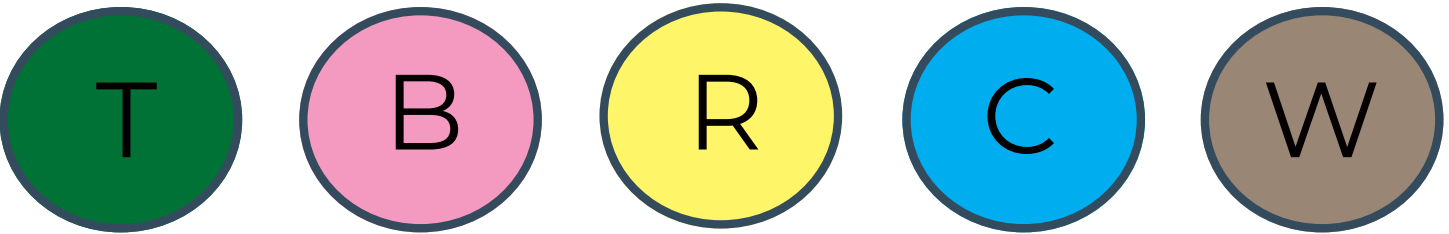

Help collect the rest of the apples from the yard. Can you count how many there are? Trace each number and then color each apple in red to add them into the bucket.

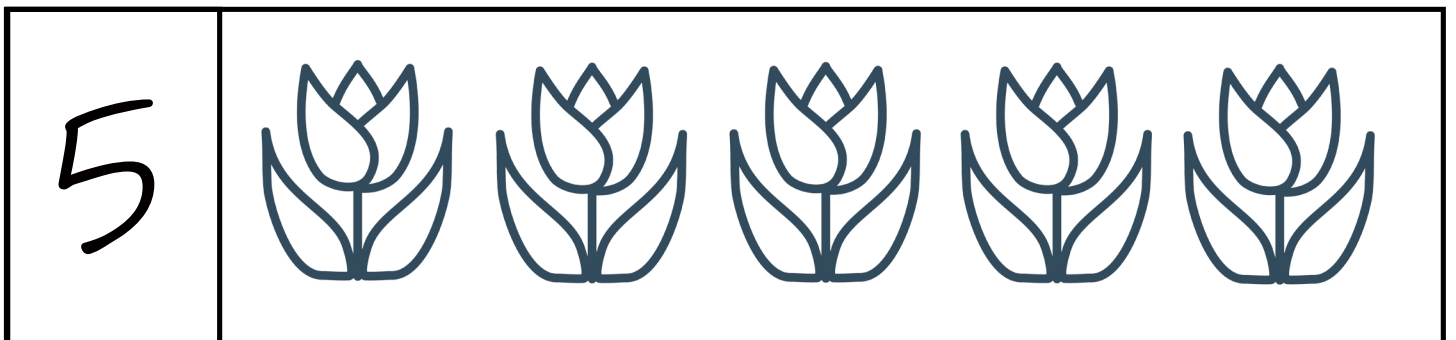

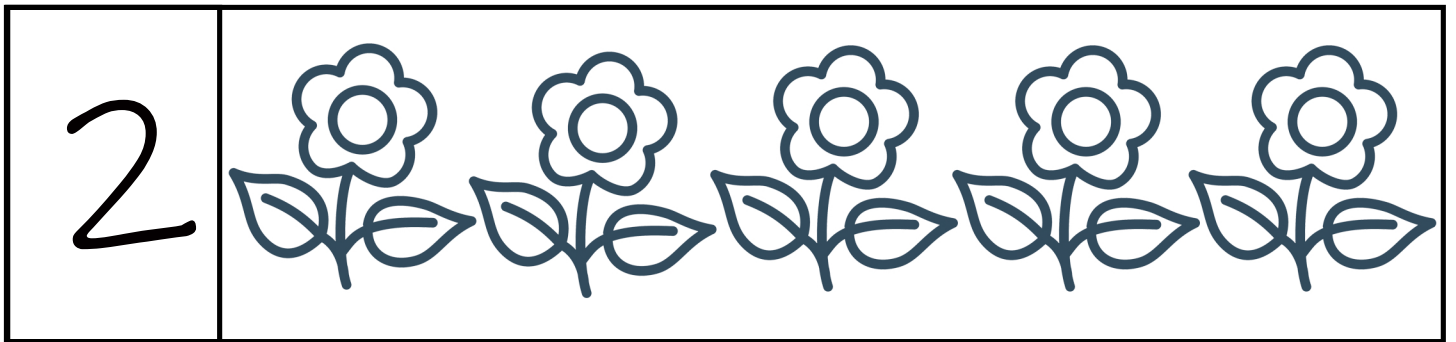

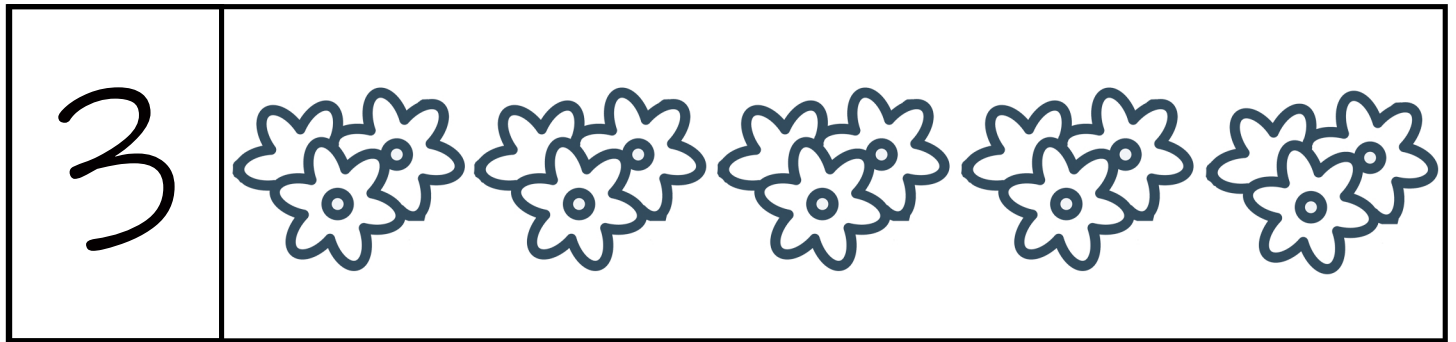

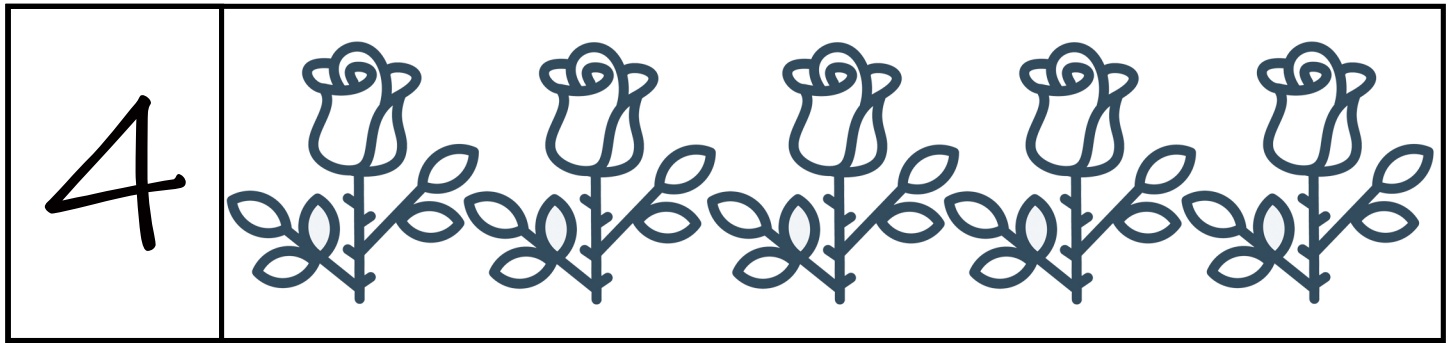

Flowers need lots of water to grow. Help water the garden by coloring in all the water droplets in blue. Then the flowers will be ready to bloom and for you to color in with your favorite colors!

There are three colorful birds resting in the tree. Match the letters at the top, to the ones on the tree and color in with those same colors.

Count and color! Use the number on the left hand side to let you know how many flowers need to be colored in on that row. Use all your favorite colors!

Below are some tools you need to help look after your yard. Can you draw a line from the correct word to the correct icon? Good luck!

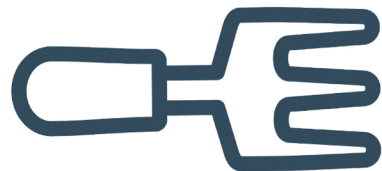

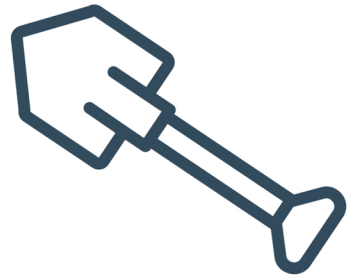

Shovel

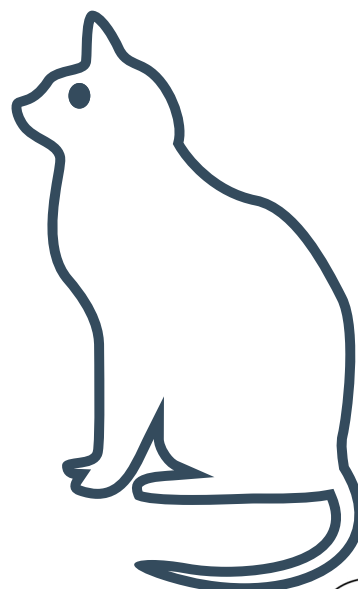

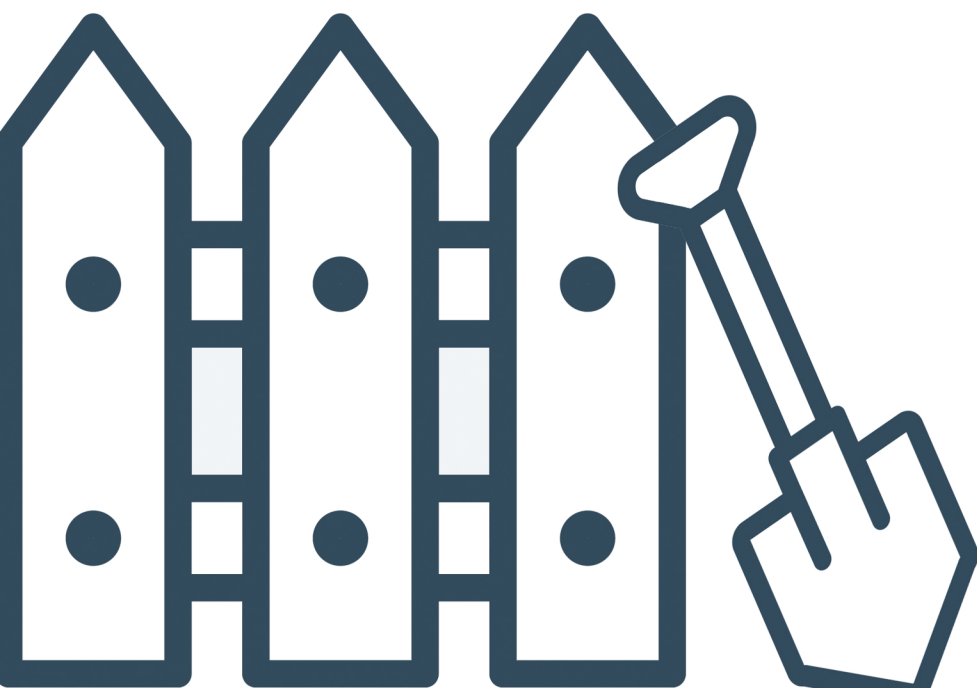

Fork

Rake

Scissors

Pruner
